

Pro-Solution
ICT

A Leading ICT Solutions Provider

Pro-Solution
ICT

Pro-Solution ICT was founded on 27 July 2000 as a Closed Corporation, providing Satellite Communication solutions to enterprises setting up new- and upgrading existing Satellite Communications Networks.

In the early days Pro-Solutions ICT only provided Satellite Communication solutions on a full turnkey basis that included the design, supply, install, commissioning and support of a network that enhances service delivery.

As a result of strategy realignment and vast experience of the founder members, Pro-Solutions ICT started to consult and provide full turnkey ICT solutions on various platforms and communication mediums that include but not limited to Satellite, Microwave and Optic fibre.

We are proud to claim that Pro-Solutions ICT has numerous uniquely tailored turnkey ICT solution projects throughout Africa.

Pro-Solution ICT is a majority black-owned, level 2 Broad-Based Black Economic Empowerment (B-BBEE) company with our head office located in Pretoria, South Africa, however our target market is the entire African continent.

Through the years, Pro-Solution ICT developed good relationships with leading suppliers of satellite, optic fibre and microwave equipment, which has allowed us to deliver trusted and reliable equipment as part of our solutions to our customers.

We undertake to consistently exceed our client's expectations, providing them with the latest technological solutions thus allowing us to work hand in hand with them to support their growth.

Our mission is to be the business partner of choice for Africa's leading service providers, governments and enterprises by providing ICT strategies, products and services that will deliver long - term commercial benefits based upon our client's key business requirements.

Pro-Solution ICT will assist you every step of the way, starting by identifying the requirement and designing a specialised solution. Once the customer approves the design, we will source the equipment and our highly experienced team will install, commission, support and maintain the customer's valuable infrastructure.

Our Capabilities:
